NEW! Image Critique Forum Software

NPN is pleased to announce the unveiling of its new, proprietary image critique forum software. The new software not only streamlines and greatly simplifies the image critique process, but with a thumbnail display of all images, adds a whole new level of fun to the process! Benefits include a much simplified method for [N/TPN Members](#) to upload their images, the ability to view thumbnail pages by photographer, choose custom background colors and much more. Be sure to see the new software [in action](#) and check out our [full report](#) in the current issue of [Nature Photographers Online Magazine](#).
